

New Horizons in Art and Education

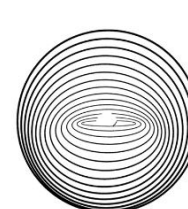

Enjoy Studying

The university offers a diverse bunch of international academic programs. The range of official languages is presented with English, Italian, German, and French, which creates a perfect environment for studying and scientific research.

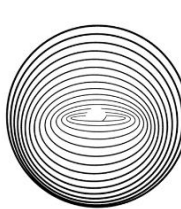

Bachelors and Masters

Over 30 multilingual courses are available in the following disciplines: Engineering, Economics, Natural Sciences, Computer Science, Education, Communication, and Design and Art. Some master's programs are taught entirely in English.

Faculties

We are a university at the crossroad of global and local, traditional and innovative. Our academic programs and research are in a close link with local needs but also have a strong international outlook.

Fine Arts

Develop your creative skills through traditional disciplines like drawing, painting, and sculpture, while exploring contemporary practices.

Digital Arts and Media

Master cutting-edge digital techniques to bring your artistic vision to life.

Our library branches at the three campuses hold more than 290,000 printed books and more than 450,000 e-books. Thanks to their modern facilities and user-oriented policy they count more than half a million visits.

Generation Press, publisher of the Free University founded in 2014, assists stuttes researchers with their publishing activities to make the research findings accessible to an international public.
